AMAN SHARMA

FULL-STACK SOFTWARE ENGINEER • AI & CLOUD SYSTEMS

B.Tech CSE • Specialized in Python (Flask), Neon PostgreSQL, RESTful APIs & Gemini AI

Phone: +91-9690683156 | **WhatsApp:** +91-9690683156
Email: codewithaman88@gmail.com | **Location:** Mathura & Lucknow, UP
Portfolio: codingwithaman1.github.io/PORTFOLIO
GitHub: github.com/CodingWithAman1 | **LinkedIn:** linkedin.com/in/aman-sharma

TECHNICAL SKILLS

Languages
Python, JavaScript (ES6+), SQL, C, HTML5, CSS3

Frameworks & Web
Flask 3.x, Jinja2, REST APIs, Chart.js, Bootstrap 5, Tailwind

Databases & ORM
PostgreSQL, Neon DB, SQLite, SQLAlchemy 2.0 (Relational schema, Migrations)

AI & Tools
Google Gemini AI Vision, Git, GitHub, Linux, Bash, Postman

Cloud & Hosting
Vercel Serverless, Render, Cloudinary CDN, Neon Cloud DB

CORE COMPETENCIES

✓ Full-Stack Web Development
✓ Multimodal AI Vision Integration
✓ Relational Schema Design & ACID
✓ Serverless & Cloud Microservices
✓ Rapid Prototyping & Clean Code

EDUCATION

B.Tech in Computer Science & Engg.
G.L. Bajaj Group of Institutions, Mathura
AKTU • 2022 – 2026 • **CGPA: 7.8 / 10**
Coursework: OS, DBMS, OOP, DSA, Networks

Intermediate (Class XII) • PCM
Brightland School, Lucknow (CBSE)
Scored: **78%** • 2024

High School (Class X)
Brightland School, Lucknow (CBSE)
Scored: **82%** • 2022

CERTIFICATIONS

- **Python Programming**
  Reliance Foundation & N.S.D.C. (90h)
- **Cisco CyberSecurity & AI**
  AI & Security Learn-a-Thon
- **Upskilling Program for Python**
  Upskill Campuses & IoT Academy
- **Problem Solving**
  HackerRank Verified Certificate

LANGUAGES

- **English** – Professional Working
- **Hindi** – Native / Bilingual

EXECUTIVE SUMMARY

Forward-thinking **Computer Science Engineer & Full-Stack Developer** with demonstrated expertise engineering resilient web architectures, transactional database systems, and AI-assisted workflows. Proven track record deploying full-stack platforms to production (Render, Vercel) featuring multi-role authentication, multimodal vision intelligence (Google Gemini AI), and real-time analytics. Passionate about architecting scalable, high-performance, user-centric software.

FEATURED PROJECTS

CIVICCONNECT — AI Civic Action & Grievance Platform
[Live App] [GitHub]
Tech: Flask 3.x • Google Gemini Vision AI • PostgreSQL • Leaflet GPS • Cloudinary

- **Architected full-lifecycle civic platform** with role-based routing across Citizens, NGOs, and Municipal Admins.
- **Automated triage pipeline using Gemini AI Vision** to scan uploaded photos, categorize municipal defects (potholes, garbage, leaks), and score priority.
- **Built Haversine GPS clustering (300m radius)** to merge duplicate citizen complaints and prevent municipal dispatch backlogs.
- **Implemented visual resolution audit verification** comparing before/after repair photos before marking tickets resolved.

INVENTRA — Smart Cloud Inventory & Stock Analytics
[Live App] [GitHub]
Tech: Flask • SQLAlchemy 2.0 • Neon PostgreSQL • Chart.js • Vercel Serverless

- **Engineered production warehouse inventory system** with real-time stock monitoring, supplier directories, and automated low-stock reorder alerts.
- **Implemented strict relational audit trails** recording all stock delta adjustments with database transaction guarantees.
- **Designed interactive Chart.js dashboards** delivering warehouse asset valuation, monthly movement graphs, and CSV data exports.
- **Optimized serverless WSGI deployment on Vercel** utilizing Neon cloud PostgreSQL with connection pooling.

MYRAIL — Real-Time Indian Railway PNR & Live Tracking
[GitHub]
Tech: JavaScript (ES6+) • RapidAPI • Railway REST APIs • Asynchronous Fetch • Bootstrap 5

- **Engineered responsive railway tracker** providing instant PNR status, live train running status, and station autocomplete lookups.
- **Built asynchronous client-side API caching layer** with robust error handling for API quotas and network timeouts.

AMANZON — Responsive Full-Featured E-Commerce Storefront
[GitHub]
Tech: HTML5 • CSS3 (Modern Flexbox & Grid) • JavaScript • LocalStorage State

- **Developed multi-page e-commerce storefront** featuring responsive product catalogues, dynamic cart state management, and modal checkout.
- **Ensured pixel-perfect cross-browser design** optimized across desktop, tablet, and mobile viewport breakpoints.

WORK EXPERIENCE

Web Development Intern — *3 Skills India*
July 2024 – Aug 2024
Front-End Engineering & Responsive Web Architecture
Remote Internship

- Developed and modernized responsive web modules with clean semantic HTML5, CSS3, and JavaScript.
- Optimized cross-device styling, reducing layout shifts and improving frontend performance across mobile viewports.
- Participated in sprint reviews and UI/UX design refactoring under senior engineering mentorship.

KEY ACHIEVEMENTS & HIGHLIGHTS

- **Production Cloud Deployments:** Architected, deployed, and maintain 4 live full-stack web platforms on Vercel and Render.
- **Algorithmic Problem Solving:** Solved 150+ DSA and algorithmic problems across LeetCode & HackerRank (Python & C++).
- **Smart India Hackathon (SIH) Internal:** Conceptualized and developed AI-assisted civic grievance routing prototype.
