SUMMARY

Computer Science Engineering student with a keen interest in software development and web technologies. Familiar with HTML, CSS, JavaScript, C, Python, and SQL, and have applied these skills in academic and personal projects. Eager to learn, adapt to new technologies, and strengthen problem-solving abilities through practical experience. Looking for opportunities to gain industry exposure, contribute to real-world projects, and continue growing as a developer.

TECHNICAL SKILLS

HTML	SQL	MS Office
CSS	C	Flask and Jinja
JavaScript	Python	bootstrap

PROJECTS

AMANZON (E-commerce web interface) (USING HTML AND CSS)

- Developed a fully responsive **Amazon web interface clone** using only HTML and CSS, mimicking core UI features of the original platform.
- Implemented intuitive layout structure using **Flexbox and Grid** for seamless user experience across devices.
- Designed interactive elements such as **navigation bar, playlist section, music controls, and album thumbnails**

myRail (USING HTML,CSS, JS and APIs)

- Developed **MyRail**, a responsive railway information web application using **HTML, CSS, and JavaScript**, featuring Live Train Status, Train Search, station lookup, and ticket booking redirection.
- Integrated railway **APIs** for real-time data, implementing asynchronous JavaScript, input validation, and error handling for reliability.
- Created an intelligent station search with autocomplete using a comprehensive database for quick selection.
- Built a **mobile-responsive interface** with dynamic forms and optimized layouts for a seamless user experience.
- Enhanced **UI/UX with AI tools**, structured code organization, and reusable components for improved performance and maintainability.

tRex runner (p5.js library)

- Made the **CLONE** of the Chrome Trex Runner using js librabries such as the **p5 library**.

INVENTRA (Flask, Bootstrap, SQLAlchemy, SQLite)

- Developed INVENTRA, a full-stack **inventory management web application** using **Flask**, **Bootstrap**, **SQLAlchemy**, and **SQLite** for efficient stock management.
- Implemented **CRUD** operations for products and suppliers, enabling users to **add**, **update**, **delete**, and **manage** inventory records through an intuitive interface.
- Designed a relational database schema with **SQLAlchemy** to maintain product, supplier, pricing, and stock information with data integrity.
- Built an interactive dashboard featuring inventory tables, supplier management, and analytical charts for stock insights and decision-making.
- Integrated **Jinja2** templating with Flask routing to dynamically render inventory data and provide a responsive user experience.

CERTIFICATIONS

- Received an Internship Completion Certificate from 3 Skills India for completion of 2 months web-dev internship.
- Took part in Cisco learn-a-thon and earned about CyberSecurity and Modern AI.
- Completed a 90 hour skill program by Reliance Foundation and N.S.D.C. on “Python Programming”.
- Completed a skill based upskilling Program for Python provided by Upskill Campuses and The Iot Academy.

EDUCATION

- **B. Tech. (CSE) | 2025 - ongoing | G.L. BAJAJ INSTITUTE OF TECHNOLOGY AND MANAGEMENT**
- **INTERMEDIATE | 2024 | BRIGHTLAND SCHOOL**
- **HIGH-SCHOOL | 2022 | BRIGHTLAND SCHOOL**
